About me

Dynamic and results-driven B.Tech (CSE) 2026 graduate with a versatile skill set spanning talent acquisition, sales, marketing, demand generation, and business development. Adept at driving recruitment initiatives while aligning with organizational growth strategies, managing client expectations, and delivering measurable results. Experienced in project coordination, market research, and consultative problem-solving to connect business needs with innovative solutions. Recognized for building strong professional networks, fostering cross-functional collaboration, and adapting swiftly to fast-paced, competitive environments.

Education

Chandigarh University, B.E in Computer Science | Aug 2022 – Exp. June 2026
- **Coursework:** Computer Architecture, Computer Networks, DBMS, Operating System, Cloud Computing

Patna High School, Patna, Intermediate (BSEB) | May 2020 – July 2022
- **Coursework:** Physics, Chemistry, Math, Biology

Don Bosco Academy, Patna , Matriculation (CISCE) | March 2019 – April 2020

Projects

HygieneHUB | November 2024

Developed Hygiene Hub, a platform for booking professional cleaning services, allowing users to schedule cleanings, track service status, and make payments. Built using HTML/CSS, JavaScript, React.js, Node.js and MySQL, it streamlines service management and enhances user convenience with an efficient booking system.

Cross-Browser Automation Test with Selenium Grid and TEST NG on Browser Stack | Jan 2024

Developed a cross-browser automation testing framework using Selenium Grid and TestNG to ensure seamless web application compatibility across multiple browsers and devices. Integrated BrowserStack for cloud-based testing, enabling parallel execution and reducing test execution time. Implemented data-driven and parameterized testing to enhance test coverage and efficiency. Automated test scripts validated UI functionality, responsiveness, and performance across different environments.

Ecommerce website Testing by Automation Testing Tool | DEC 2023

Automated testing for an e-commerce website using Selenium WebDriver and TestNG to validate key features like login, product search, cart, checkout, and payments. Integrated Selenium Grid for cross-browser testing and Jenkins for CI/CD to ensure seamless functionality and performance.
